DUROplastic

Where does the Element Range come from?

Element is a division of Duroplastic Technologies cc and has been manufacturing self standing sanitary ware for over 14 years. Sister companies such as Paradyne and Palazzo compliments the Element range.

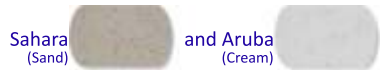

What are the products manufactured from, and how are they made?

Each product is cast in a mould, and is therefore completely solid, and the same colour all the way through. The liquid, called Resiquartz, has a resin based formula, and contains organic fillers, giving each a unique finish. The liquid in the mould is de-gassed, and allowed to cure in a special oven. Once this process is completed, the product is de-moulded and finished by hand.

What colours are available?

All products available in White with a satin finish and are made from resiquartz

*Also available in stone colours: Sahara and Aruba have a smooth matt inner and a rustic outer.

Have a look at our website **pop-colours** for more colour options. **metalliccolours**

Installing an Element basin

This is a very standard installation. Note that when installing a Top Mount basin, a joining collar and an extension piece is necessary to allow the short 32mm waste fitting to go through the basin and the slab. When installing a Wall Mount basin, it is important to ensure that the basin is well supported.

Installing an Element bath

- Check delivery of product from merchant or courier to ensure no damage to the bath in transit.
- Move the bath to its correct position by means of a shade net cloth harness.
- Mark out position of drain hole. Remove bath to another position.
- Take drain fitting and gooseneck for the bath and chip out area below drain hole already marked.
- Ensure there is NO constriction or stress in the fittings.
- Fit the waste fitting onto the bath with correct sealer. Do not use window putty.
- Place bath on some bricks to allow plumber to join the waste to the gooseneck below the bath.
- Lower the bath by removing the bricks.
- At the same time use a small amount of silicone in four corners and bed down bath on them.
- Clean any squeezed amount away.

© Catalogue - on order only

*Furo

Oval Top mount Basin with sharp edges and well defined lines, matches the Maji and Mizu oval baths perfectly.

Length 510 mm
Width 375 mm
Height 135 mm

*Fuji

Favourite circular Top mount Basin with sharp edges and defined lines.

Diameter: 420 mm
Height: 140 mm

*Yochi

Classic deep bowl Top mount Basin with sharp edges and defined lines.

Diameter: 410 mm
Depth: 140 mm

@Wasgij

Modern sleek lines with good depth and clean sharp lines.

Length 515 mm
